Market Overview

Brussels is a growing market with a core European location, home to the European Union and with access to over 274 million people in a 800-kilometer radius, among the highest for large cities on the continent. Brussels offers direct fiber connectivity to several cities, including primary markets such as Amsterdam and Paris and secondary cities across Germany, along with direct access to the main Belgian cable landing at Ostend.

Major cloud platforms have entered Belgium in recent years, with these global clients interested in the unique location that the country offers among other larger economies. Belgium has proven welcoming to data center development to date, with power pricing more reasonable than many larger data center markets across Europe.

Campus Highlights

- 16 MW operational
- Network diversity
- 18 km from downtown Brussels

EdgeConneX Benefits

Capability

State of the art data centers with the flexibility to support deployments ranging from a single rack, to large custom cages or pods, all the way to build to suit data centers any of which can further scale to meet future needs for growth.

Connectivity

Many leading NSP's and MSO's are deployed in our Brussels Data Center and available for interconnection.

Capability

Purpose-built Tier-3 designed facilities with superior operating reliability, high-density power, and carrier-neutral support to satisfy any customers challenges and demands.

Cloud

Multi-Cloud access solutions for enterprises may be supported locally through our technology and solution partners meaning customers can locally access leading CSP's directly from our Brussels Data Center.

Customer Experience

We aim to deliver a premium customer experience and proximate data center solutions, allowing you to deliver a premium experience to your own customers.

Partners

Our world-class partners help EdgeConneX deliver the combination of solutions your business needs.

Technical Specifications & Configuration

Space

25,000 sqm building

18 km from downtown Brussels

28 km to Brussels Airport

Customer work space available

Space available for secure customer storage

WiFi network access and cell phone repeaters/boosters throughout the facility

Power

16 MW N+1 capacity

Capable of 20 kW+ per cabinet

Real-time branch circuit monitoring

Concurrently maintainable power in a minimum of an N+1 configuration to include: -PDU- UPS- Generators

Cooling

The facility has robust and redundant power and cooling to support any application. Where temperature and humidity is monitored, controlled and managed to industry standards.

Temperature and humidity monitored, controlled and managed to industry standards

30 inch raised/under floor forced air plenum

N+1 CRACs located in separate suites, maximizing customer-designated areas

Security

Multi-stage security containment systems that use PIN and live video authentication

Mantraps and strictly enforced protocols regarding entry access

24/7 Color CCTV/video surveillance and

>90-day online video storage
Interior managed security zones

National network operations center for security management

24/7 NOC services

Fire Suppression

Pre-action, zoned dry-pipe sprinkler systems with zoned maintenance aisles and separate suites

Network

Building POEs are diverse, with a variety of fiber conduits to physically diverse MMR's

Interconnection services available

Optional Services

Remote hands services for break fixes, configuration, and troubleshooting

EdgeConneX Services: design, build, implement and maintain your equipment infrastructure

EdgeOS, our next generation data center operating system provides real-time visibility, including ticketing and SLA management for all EDC locations

Standards and Certifications

Our facilities are SOC2 Type 14, ISO 27001, PCI DSS and HIPAA compliant.
